Based on Article 7.6.3.9 of the Natural Gas Trade General Terms

Information provided in accordance with Government Decree no. 399/2023 (VIII.24.) on the measures serving to preserve the security of natural gas supply

Obligations according to Government Decree number 399/2023 (VIII. 24) on the measures serving to preserve the security of natural gas supply (hereinafter: the Government Decree):

The user is obliged to implement the restriction **by way of self-restriction within a maximum of 4 hours after the electronic message is sent out about the restriction**, as long as there is no express unique permission for a longer implementation period, which means that it is obliged to keep its consumption of natural gas below the specified amount and capacity. It is the user's obligation and responsibility to keep the electronic contact information up to date. The restriction can be full or partial. It is important to note that the restriction can be a full restriction despite the exception.

The legal consequences according to the Government Decree that may be applied in case of the user's failure to implement the restriction:

If the user fails to comply with the restriction, the network operator **technically excludes** the user **from the natural gas supply** for the duration of the restriction. This means that the natural gas distribution licensee is obliged to prevent any further illegal consumption of natural gas, for the purpose of which the licensee arranges for **the pipeline to be cut off and the consumption meter dismantled and sealed**.

The volume of natural gas **consumed** by the users affected by the restriction **above** the specified value corresponding with the restriction category or the exception of restriction according to the restriction order shall be considered **illegal consumption**, which the user subject to the restriction shall settle with the transmission network operator by paying an **extra fee fifty times** the value of the highest price of the transactions concluded on the trading platforms during the 5 gas days prior to the restriction.

Contact details of the distribution licensee (network operator):

In the case of the individual places of consumption, the competent distribution licensee can be identified with the help of the fourth and fifth digits of the POD identifier, according to the table below:
